

A western Swedish company in electronic business communication takes leading position for the future.

Press Release 01-03-13

Global electronic Business Communication (GeBC), which provides seamless electronic business communication through EDI solutions, clarify its offer and work from today under the name EDI Solutions. EDI Solutions enables providers of all sizes to digitally communicate their business processes with giants in the automotive, retail and public sector. With a focus on innovative SaaS (Software as a Service) combined with solid support is now growing EDI Solutions to one of the largest players in the industry.

EDI Solutions provides unique connections to automotive, retail and public sector integrated with a variety of business, both nationally and internationally. This enables revolutionary opportunities for players who previously could not sell to these buyers. EDI Solutions operations are based on technology that customers do not have to invest heavily in advanced and complex in-house systems known as SaaS Solutions.

An innovator at the front edge.

EDI Solutions recently updated platform connects the majority of commercially available ERP's. The solutions are secure, flexible, and transparent and enables one to connect major business towards smaller business. This combined with a solid list of clients provides opportunities for many providers who may not have previously had the opportunity to connect with and sell to the big giants. "Our business model is based on clear pricing models and as a customer you pay only for what you use, without costly investment in either hardware or software. We want our customers to be expending as little time as possible with EDI and our services require no investment cost in expensive systems. We take care of the entire EDI process for our customers", says CEO Lars-Göran Andersson.

A new identity gives us the strength to grow.

"With close to clients, we sanded the values we stand for and deliver - focus, energy and entrepreneurial spirit. This must permeate all our activities, "said one of the owners Bengt Bergstrom.
